Logic is the science of reasoning and argument. It deals with an examination of the form of valid inference. Logic as an academic area, involves the classification of arguments, the study of semantics, fallacies and paradoxes. An argument is a set of premises that are constructed to establish a proposition. Critical thinking is the objective analysis of facts or situations using logic and rationality to form an informed judgment. Observation, analysis, interpretation, inference, explanation, evaluation and metacognition are inherent attributes
