Yet, voluntary demand from people has been low, shedding doubt on the viability of microinsurance as a useful risk-management tool. To better understand this puzzle, this paper reviews both the theoretical and empirical literature on the demand for insurance. While people's lack of understanding of insurance does seem to limit the demand for it, several more fundamental factors, such as price, quality, limited trust in the insurer, and liquidity constraints also seem to have an important ...

~~Landscape study | Microinsurance~~

Microinsurance is a type of insurance that offers highly specified policies to cover specific needs at an affordable rate. It is designed to make essential insurance options more available to low-income people around the world. Innovative forms of microinsurance such as pay-per-mile auto policies are becoming popular in the U.S.
