IATA airport code - Wikipedia

Military airfields do not generally have IATA codes allocated, but because of the need to have baggage tagged on military flights on which civilians are allowed to fly, for example the Falklands Air Bridge, IATA-approved codes have been allocated for military bases such as Brize Norton, Ascension Island and Mount Pleasant on the Falklands.

IATA Code Allocations | North West Air News

The human-readable license plate will have either a two-character or a three-digit IATA carrier code. For example, it may be either "BA728359" or "0125728359." "BA" would be the two-character IATA code for British Airways), and "125" would be the three-digit IATA carrier code. Nevertheless, the barcode will always be the full ten digits.

The only correct format of baggage tag number should be e.g. 7512123456 rather than RJ123456. In this example: ☐7☐ is the ☐leading digit☐ + "512" is the 3-digit airline code + "123456" is the 6-digit bag number. As such the last digit is not special in any way. A list of three digit airline codes may be found on the IATA's website. In your example, 176 belongs to Emirates.

ICAO vs. IATA Codes - What's the Difference? | by ...

IATA delay codes were created to standardise the reporting by airlines of commercial flight departure delays. Previously, every airline had its own system, which made the sharing and aggregation of flight delay information difficult. IATA standardised the flight delay reporting format by using codes that attribute cause and responsibility for the delay; this supports aviation administration ...
