Synopsis. In this eighth edition, authors Vander, Sherman, and Luciano continue their approach, teaching students the importance of mechanisms and regulation, so that they begin to think in terms of processes and sequences, rather than simply memorizing the information. The work presents fundamental principles and facts of human physiology in a format that is suitable

"In 1970, Drs. Vander, Sherman and Luciano created what has long been regarded by many as the most complete, readable and up-to-date Human Physiology textbook in the world. I am honored and thrilled to take over the reigns of this wonderful textbook, as it moves into the rapidly expanding realm of 21st century physiology.
