Similarly, the volume of three pyramids is real to the volume of one prism with the same base and height. The volume of each cone is equal to $\frac{1}{3} Bh = \frac{1}{3} (28.3 \times 10) = 94 \frac{1}{3} \text{ cm}^3$. The volume of all three cones combined equals 283 cm^3 . The volume of the cylinder is equal to $Bh = 28.3 \times 10 = 283 \text{ cm}^3$.

Geometry is one of the oldest mathematical subjects in history. Unfortunately, few geometry study guides offer clear explanations, causing many people to get tripped up or lost when trying to solve a proof—even when they know the terms and concepts like the back of their hand. However, this problem can be fixed with practice and some strategies for slicing through all the mumbo-jumbo and getting right to the heart of the proof. Geometry Workbook For Dummies ensures that
